

## GENERAL:

1. Minimize kan lagi main dashboard, takperlu ada categories ni since semuanya subject math, pastu dekat bawah sekali tu takpayah ada pun okay yang open her course semua tu. Cukup sekadar ada list subjek yang available, feedbacks and how it works tu pun memadai.

2. Kat sign in, jangan display kan acc yang sedia ada. Pastu time sign in ni, tak boleh ke dia nak view password? Mcm selalu kita login mana mana website kan kadang dekat password tu ada logo mata kecil tu hahaha

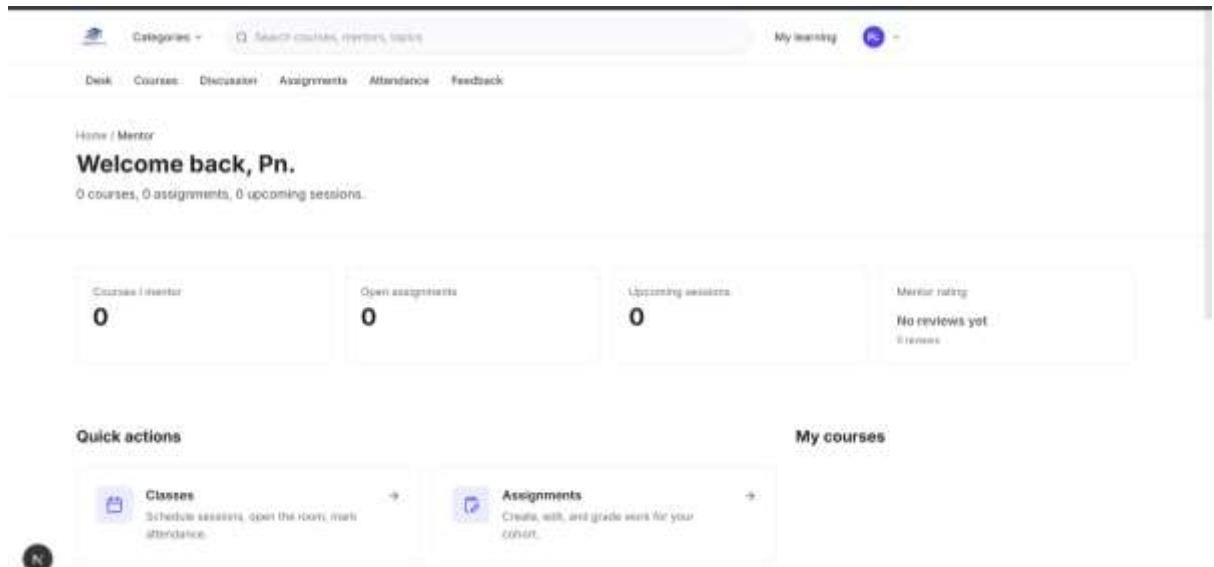

3. Mentor create acc, takleh upload file. Pastu bila success create acc pun takde apa apa popup message ke nak notify user dia dah success create acc.

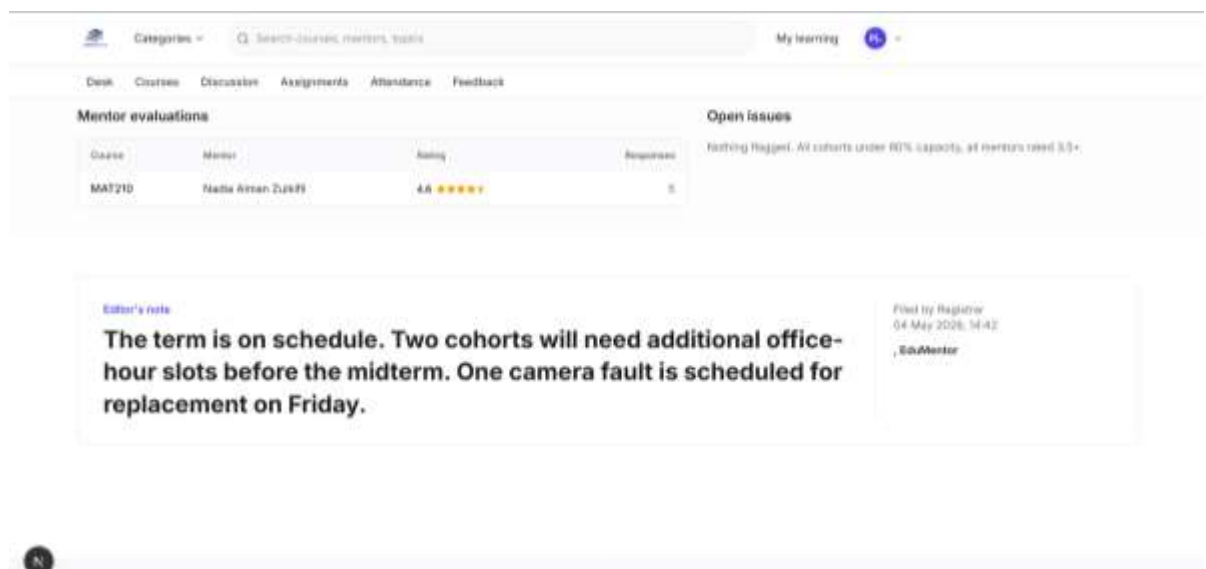

4. Kalau contoh dia semester 4, and dia jadi mentor untuk semester 2 dan 3, tapi dalam masa yang sama, dia nak jadi mentee untuk semester 4, camne dan boleh ke?
5. Boleh ke kalau buat mentee ni di assign mentor? Bukan buat general mentor la. Sebab taknak bercampur aduk. Cuma syaza takde idea cane nak buat dia assign to specific mentor (Nanti hazim scroll bawah2 hazim boleh faham kot hahaha 😞)
6. Lepastu, yang kat evaluation rubric dekat admin tu untuk admin monitor keberkesanan program tu, syaza tak jumpa pun dekat mana mentor/mentee ni evaluate ahaha sebab ada feedback je
7. Overall SV Syaza cakap, system ni mcm bercampur aduk. Macam takde privacy, ibarat semua mentor ke mentee ke boleh tengok semua sesi kelas, course lain. Dia kata okay dah cuma serabut bercampur aduk, students akan keliru dan tak logik

## ADMIN:

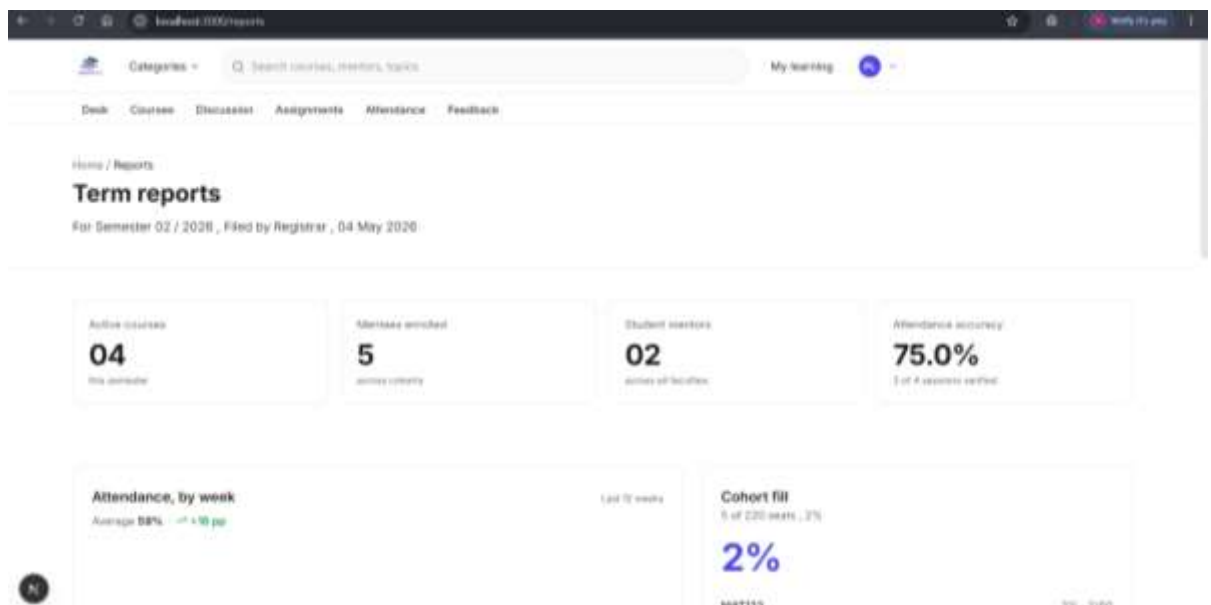

1. Admin username guna je normal mcm – admin. Takperlu no staff since system support sorg je admin
2. Kenapa dashboard admin boleh tukar kepada mentor console? Pastu kenapa admin navigation pun ada courses discussion assignments apa semua tu? Sebab bila di tekan each navigation bar tu, dia auto admin ni mcm page mentor/mentee hahaha. Bila tekan admin console baru dia keluar mcm admin mcm bawah ni

3. Editor note ni untuk apa, kalau tak penting takperlu pun tak apa.

- Untuk report display ni, boleh ke kalau buat display by course? So contoh admin boleh monitor progress program mcm attendances ke review ke or lain2 by each course la bukan overall.

- Edit course ni letak basic je cam course code, title, abstract, semester tu. Yang lain tu mcm unnecessary je. Kenapa admin boleh edit progress pula? Bukan ke tu sepatutnya display auto sebab progress kan mana boleh update2 so dia based on progress course tula kan?

Course code: MAT133

Course title: Pre Calculus

Abstract: Functions, polynomials, exponentials, logarithms, and trigonometry, the foundation course for Calculus I.

Lecturer: Unassigned

Cohort: B.Sc. CS, Year 1, Sem 1

Semester: Semester 1

Sessions: 32

Capacity: 60

Pace: Tue & Thurs, 16:00

Progress %: 64

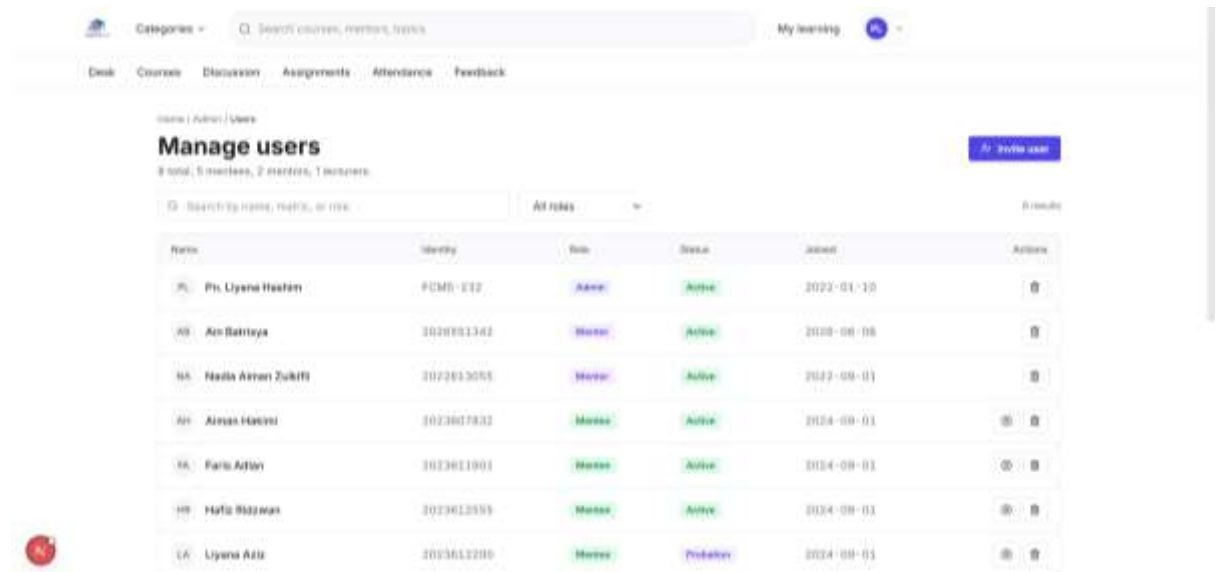

Enrolled: 3

Colour: askood

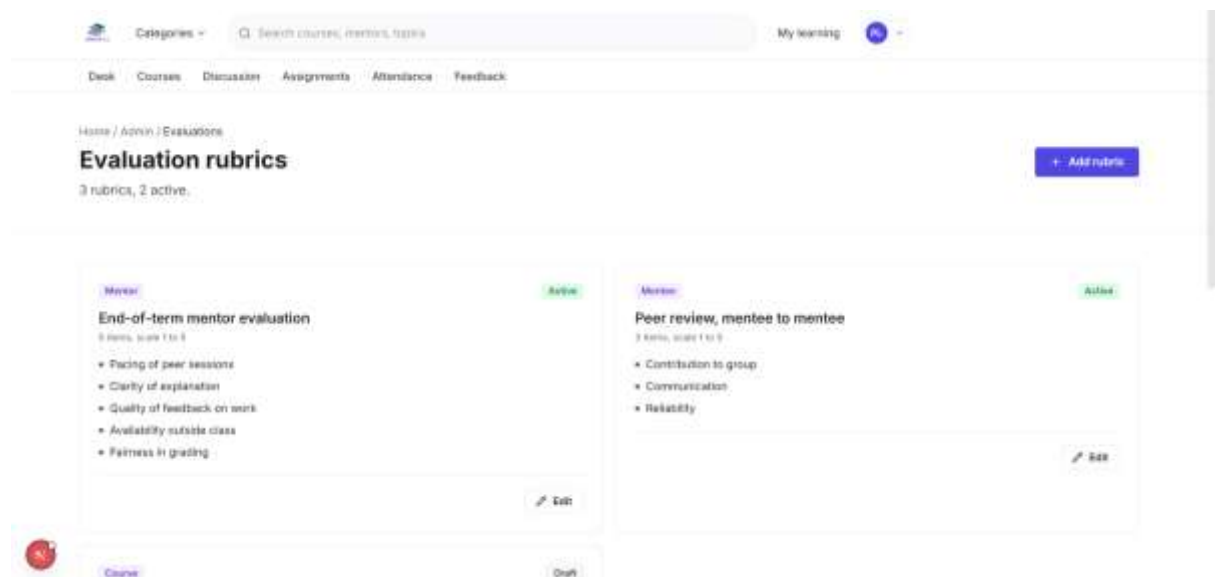

Buttons: Delete this course, Cancel, Save changes

- Invite user ni takleh guna, buang jela. Pastu cth admin upgrade mentee as mentor, so bila mentee tu login acc dia akan auto display dashboard mentor ke? Kalau nak selamat,

takut makin complicated, buang je function ni takut bila run nanti dia jadi lain pula hahaha. Kiranya admin boleh view, search dan delete user jela

7. Ni haa evaluation dekat admin, tapi kat mana functions ni sedia digunakan? Sebab mentor mentee ada feedback je takde pun rate2 ni. Buat consistent. Pastu boleh view, update je eh delete takleh eh?

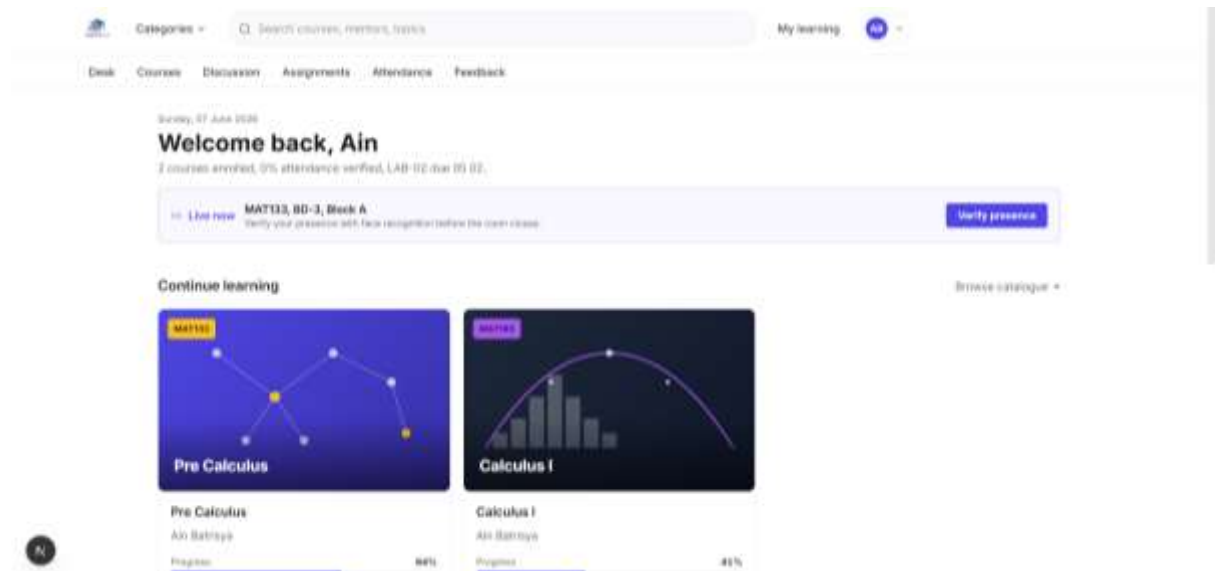

8. Room discussion tak mcm room discussion pun, buatla mcm kita sembang2 dekat group whatsapp tu ke

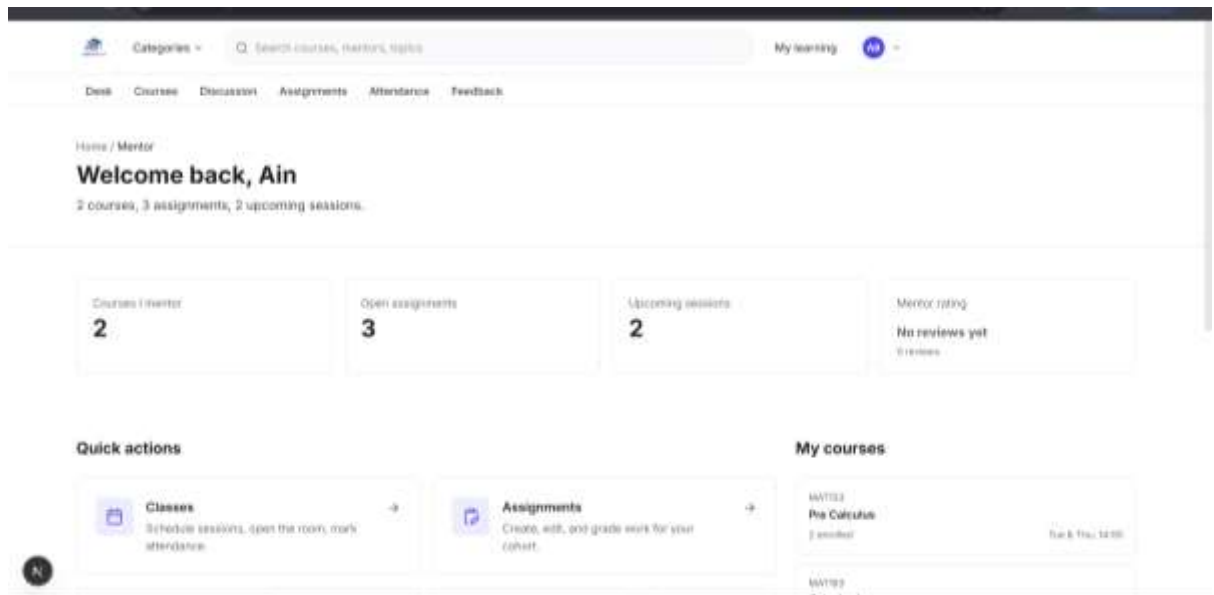

## **MENTOR: contoh akaun (Ain – Mentor untuk MAT183 DAN MAT133)**

1. Kenapa bila login akaun mentor, first dashboard dia keluar ibarat dia mentee? Kena tekan mentor console dulu baru dia keluar dashboard mentor. Lepastu, dia keluar course yang mentor dia tak enroll pun padahal. Contoh kalau dia memang ada daftar as mentee semester dia sendiri, logikla kalau ada. Pastu baru boleh tekan mentor console tu untuk dia masuk ke mentor yang dia in-charge.

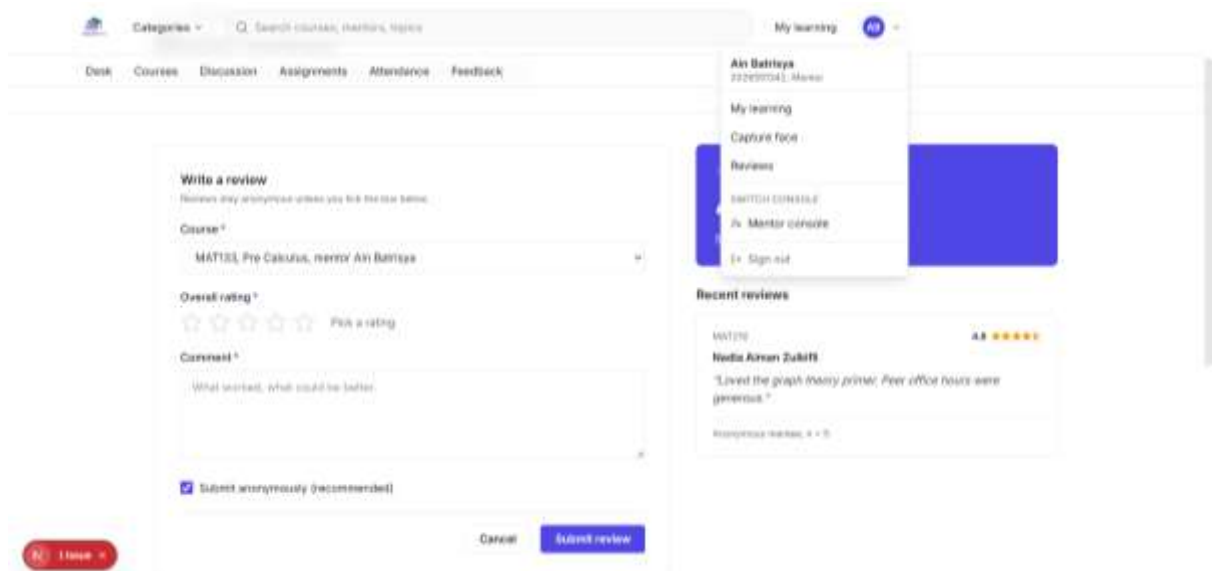

Tapi contoh kat bawah ni, syaza create acc Ain ni as mentor untuk subjek MAT183 & MAT133 and syaza takde create class lagi ke apa, kenapa dia keluar live tu mcm dah ada pending kelas eh? Lepastu kat continue learning tu pun, kan syaza takde progress apa apa lagi tapi kenapa progress dia dh ada eh?

2. Pergi dekat mentor console untuk Ain ni, tapi dia mcm bercampur aduk dengan mentor2 lain punya progress and so on. Tak boleh ke kalau each user tu ada their own work ke dashboard ke so takdela bercampur aduk. Macam cth Ain ni mentor untuk mat183 tapi bila dia ke console dia, subjek tu include progress dari mentor lain jugak cth Aiman. So mcm takde privacy and tak logik.

3. Kenapa mentor ni dia evaluate diri sendiri ahahah

4. Macam assignments, class, room discussion, attendances semua bercampur. Not recommended.

| PS-05    | Trigonometric identities, full proofs      | MAT133 | Problem Set | 14%    | 05/16 | 0/2       | Open         |   |

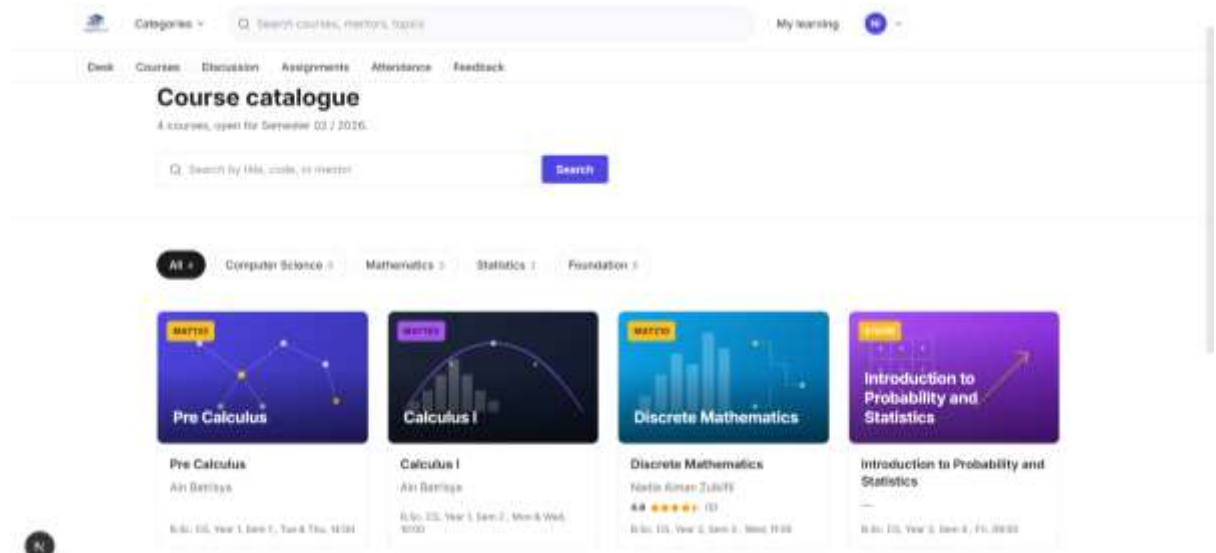

## MENTEE: contoh akaun (Nazrul – MAT183)

1. Mentor dia tulis Ain tadi, tapi dekat upcoming courses, due assignment tu dia bercampur dgn mentor lain.

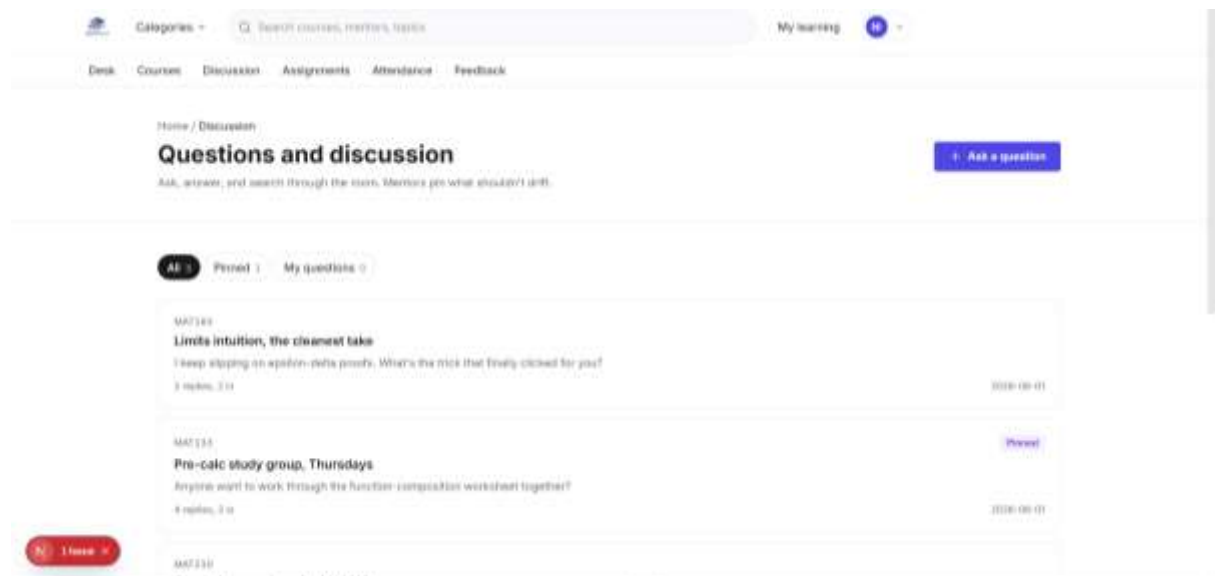

2. Kat courses ni takperlu pun tkpe. Kalau nak juga, buat dekat dashboard tapi tak necessary. (ni dekat mentor pun sama)

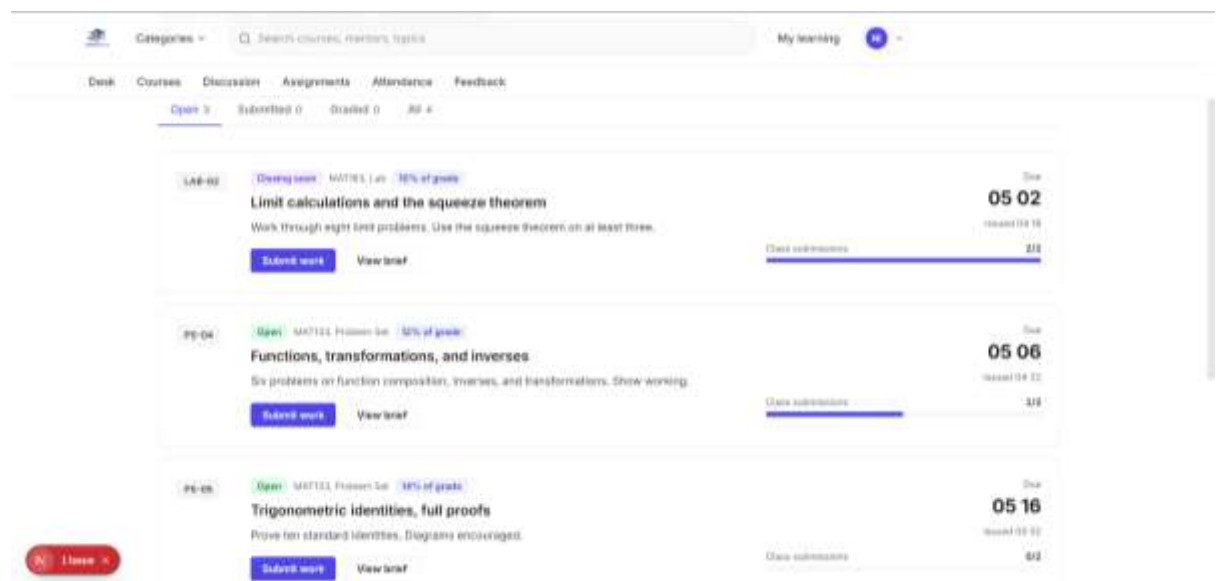

3. Discussion ni, kenapa dia boleh tengok dan join discussion course lain? Tak boleh ke buat untuk discussion group dia je? Itupun dengan mentor sendiri takpayah join discussion mentor lain. Contoh kalau mentor Ain handle 4 orang- amir, Nazrul, icam, icum, dalam conv tu ada orang berlima je. Kiranya mcm discussion group

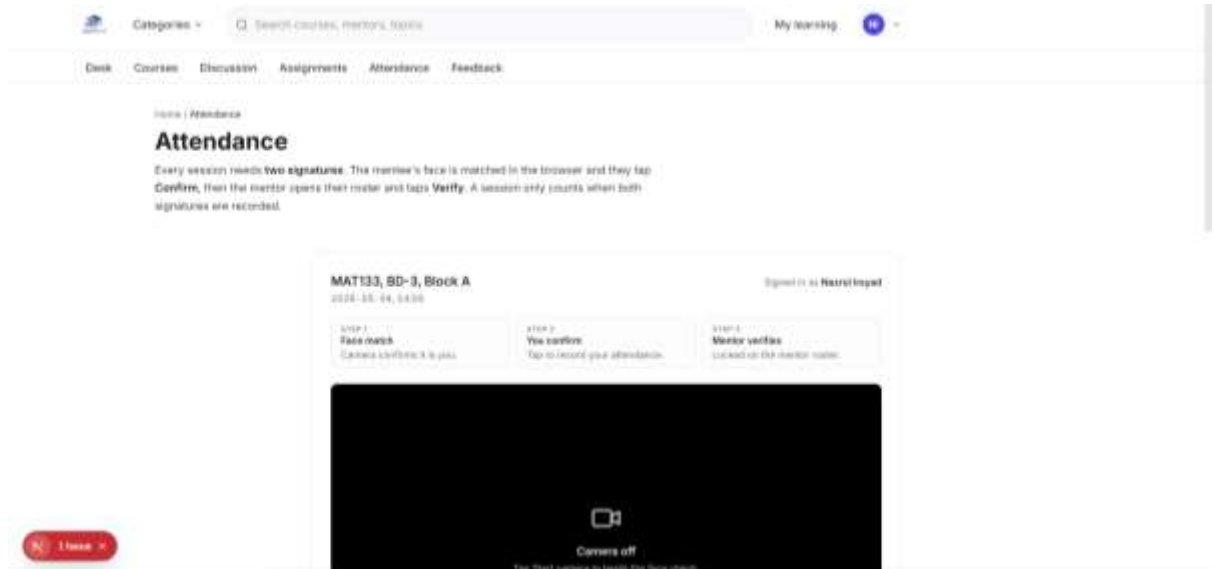

masing2 la. (ni dekat mentor pun sama, dia display semua discussion session ke course ke, tak logic)

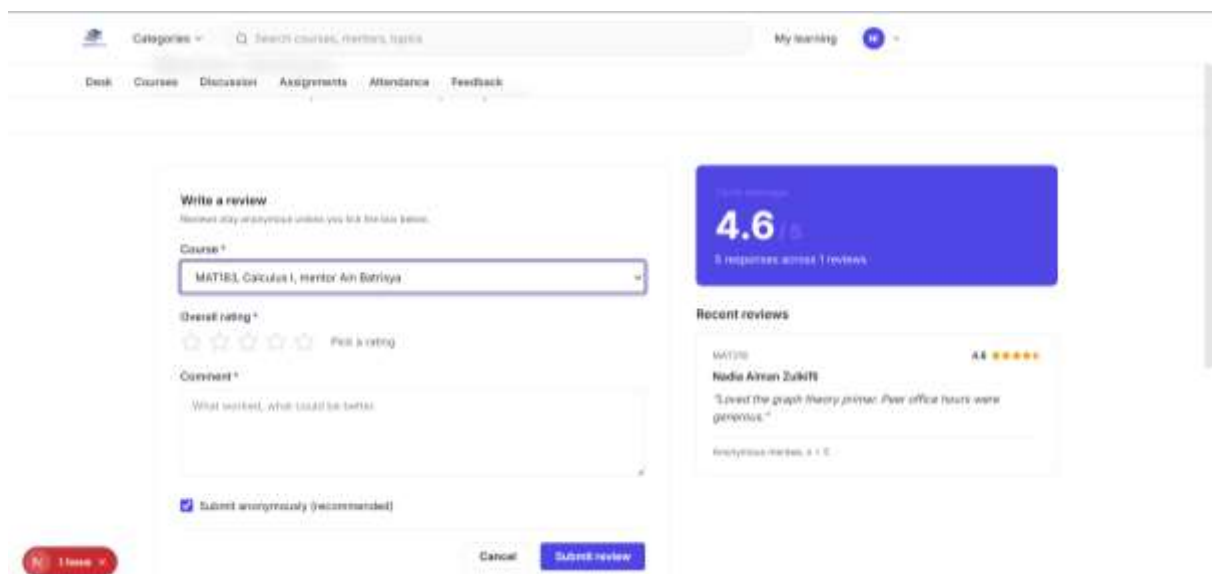

4. Kenapa assignment pun bercampur? (mentor pon sama)

5. Attendances ni boleh buat by class ke session ke? And list. Contoh mentor Ain ni tadi create class untuk topik 1, so attendances by class la should be kan? Bila mentee tekan class tu, display la basic information and link attendances ni? (mentor pun sama)

6. Feedback display ikut subjek mentee tu enroll je sebab ni untuk mentee punya console bukan admin. Cth mcm Nazrul n ikan enroll course MAT183, so feedback display untuk course dia je

Ni use case yg syaza buat balik ikut system yg siap ni, cer semak hehe
